

Levitibus

Canibus

"You want power, but you're not big enough
So you steal it piece by piece.
Take it in spoils, and step by step you'll weaken and the power is gone"

Levitibus..

I wanted some power of the chakra
With mofulean darkness describin' what I see in the process
Stone statues surrounded by neolithic objects
Ceoglyphs on the pompa
A dose of the palamine, niggaz will feel like a dream
The dream state is the playground for the supreme
Critics attempt to follow a trend
Today they call me a Charlotten but tomorrow I will be a God of men
To create a universe all I need
Is 1000, trillion, trillion degrees
So with 22, betatrons in the cloud chamber
Keep the noise down so I don't arouse my neighbors
Got a message from the falcon in the snow man
Another note in a Coca Cola can
Showed the whole planet in coded program
Enrypted by a pro-scan modem with a low band
Hold up, let me load it in

"Darling I am a scientist..(you're a person, you ought to think that)
None of this is able to work without an army.. (there's no need)
vaporizin' my spit and turnin' liquid to gas"

I was created by intelligent design
You are merely a descendant of the unmodified
You diss me out of pride
But when you're finished talkin' bout one of your bitches you're simply out
of rhymes
Even my worst album was sublime
If I don't slow down, I'll distort the timeline
Back through the time, turned into a 100 bars again
A master like the honorable Earl of Cannaben
The grand architect
Used to be a partisan to LeMarketson's theory but I lost the bet
No regrets, you live and you learn
I'm through givin' advice, I just give concern
Sterilize my hands to prevent catchin' the germs
And try to rebuild all the bridges I've burned
I prefer modesty over controversy
But what am I to do when these jerks keep botherin' me
Jealous 'cuz they cant rhyme like me
And they never had a scientific mind like me

"Darling I am a scientist..(you are a person, you ought to think that)
None of this is able to work without an army.. (there's no need)
vaporizin' my spit and turnin' liquid to gas"

I'm above average with verbal semantics
The aurora borealis in the form of a rap ballad
You look at me like "poor bastard
Why cant you manipulate billboards with all your metaphor magic?"
No matter how hard I practiced

Every microphone I sorta grabbed it
Obviously that's the wrong tactic
I went through a long period of mourning and sadness when I wrote that Stan
shit
But if you wanna see some hardcore Canibus just say so
And I'll come out the egg roll with seven death scrolls
If you can find a better flow?
Then I can find a dinosaur on the Galapagos archipelago
Hey you shouldn't fall for the naivette
Lyrically I'm the illest when my beats is ok
Food for thought, nutrition for the whole brain
Keep your neurotransmitters warm on a cold day
I'm ahead of my time, or so they say
I guess that's why I already feel old and grey
Okay, that's enough knowledge for today, I'm killin' em
You best not forget it 'cuz this is Levitibus

"Darling I am a scientist..(you are a person, you ought to think that)
None of this is able to work without an army.. (there's no need)
vaporizin' my spit and turnin' liquid to gas"
