

Fracture and Refracture

Cannibal Corpse

Breaking bones to create
Alterations bizarre
Traction forces change
The shape is warping

Gross deviations from the natural design
Madness guides his hand
Reconstruction
Angles are warping
Framework is changing

Twisting limbs into shape
Helpless patient his art
Cruelty by design
Painful contortion

Cruel alterations of the skeletal frame
Insanity spawned the plan
Malformation
Femur now bowing
Snapping and breaking

Bones set in place
Buckled inside the cast
Heal misshapen
Seeking perfection
Repeating this pattern

Fracture and refracture
Demented surgeon designs
Involuntary human sculpture

Confined and altered, they lay there for weeks
Calluses form
Evil imagination now reality

Deranged but patient, he waits while they heal
Mending complete
Vile preoccupation made this entity

Months of healing for his masterpiece
Bones rebuilt in the way that he planned
Imperfections not allowed
He'll break them
Break the bones to correct them

Fracture and refracture
Demented surgeon designs
Involuntary human sculpture
