

Evening Star

Cannons

If you only knew how much I loved you
The sky would open up and shine from Heaven above
So come on open up and give me your love, babe
Tell me I'm the one you've been dreaming of
We're dancing in the dark while we're spinning in circles
I'll take you to the top where the beat don't stop

So swing on over
Tell me that you need me again
I wanna take you high
Into the night
Like the stars in the sky
We could live out our lives
I wanna take you high
Into the night
Like the stars in the sky
We could live out our lives

If you only knew how much I refused to
Let you on your way even though you're gone
Maybe you would come back and show me the way now
Don't leave me in the dark here on my own
Hanging by a thread from the web that you're spinning
Somehow hanging on as it's falling apart

So swing on over
Tell me that you need me again
I wanna take you high
Into the night
Like the stars in the sky
We could live out our lives
I wanna take you high
Into the night
Like the stars in the sky
We could live out our lives
