

Future Love

Cannons

I saw you and I together
While I was busy crystal-gazin'
This could be future love
Future love between us
I saw a glimmer in your eyes
While I was staring into the future
This could be future love
Future love between us

And all I need is one dance with you
I can wait for you
One chance with you
I will find you, I will find you soon

I see the both of us forever
But love, it's now or never
We could have future love
Future love between us
Last chance to get it right
This could be our last night together
So let's make future love
Future love between us

And all I need is one dance with you
I can wait for you
One chance with you
I will find you, I will find you soon

I will find you
I will find you soon
I will find you
I will find you soon
I will find you
I will find you soon
I will find you
I will find you
