

## Walk With Me

CANON

What you don't understand my lingo  
Break it down  
Ain't never been the places we go  
Break it down  
The road I been walking it got that polish  
Break it down  
Bring yo lighters and torches when following  
Break it down

I'm starving, I got an appetite for better places  
This current residence is done, disintegrating  
Following hope is what we bank on start chasing  
The glory of God was spotted like it was Dalmatian  
Discovered when looking for answers in many places  
Realize we don't  
Trust God, in our nation  
A penalty paid when unbelieving its damnation,  
You better follow Or find out your Final destination  
Death!

I'm sick and tired of my inner nature  
Been waiting to travel the road of redemption and restoration  
This current earth of oppression is only D pressing  
In deed pressing I am, to find the land sacred  
If You need the escape then walk with me  
I'm the feet and hands of Eli with God in me  
That book it dwells in the heart it's to keep my arms empty  
I'm armed been ready to travel knowing that God sent me

I Look around me all I saw was total destruction  
Depraved hearted debased minds that can't function  
I was the same I entertained immoral corruption I tampered with fire  
The blaze of a woman's seduction  
I gained a little but died tryna be satisfied  
Was chained down to my pride And handed lust to the eye  
Became blind to that real beauty  
I stood craving, a place of peace in my heart beyond our imagination  
I gotta move on, it ain't no hope here  
Not even the east or west would want to coast here  
People get murdered you'll find bodies that float here  
Cuz that burner a turn A Thorough bread to toast here

You better come around follow follow  
There's peace in the land where the fathers name is hallowed hallowed  
Knowing that where you been living is vanity is hard to swallow come  
to salvation  
Grace through faith the motto y'all know!
