Yeah de whole trick of divide and rule  
Is still valid today in de west so dem say  
Divide dem and incite dem against each other  
Encourage murder among demselves  
And dem say murder among black cases  
Should bear a very little punishment you know what I'm saying  
Den dem implement methods like fertility to destruction  
Fertility destroyer, so dey shall smuggle de drugs  
Through de groves and through de drinks and through de food  
And through de channels of blackness will reduce de population  
And there are also investigating de merit of uterus  
Rentals through surrogate mothers to  
Speed up the growths of their population  
So why doeth knoweth all de reality  
Of life and still try to oppose de fire  
And me say some man weh say dem is Rasta  
And suppose to uphold de fire but dem try to oppose de fire
