

# Nothing Changes

Capsize

You're all the fucking same  
Day to day, holding hope tight  
And still, nothing changes  
You all stand and hope  
Waiting for a brighter tomorrow  
When today just passed you by  
And it feels like every day is darker than the last  
I'm not living in the past  
But this depression is all I'll ever know  
And hating you never gets old

I don't want to live  
I don't want to live another day  
With you fucking pretenders  
You making me fucking sick  
You bunch of fucking pretenders  
You make me fucking sick

I can't stand another wasted night  
I won't live another wasted life  
Tell me why  
I should try to make change  
For a world who never spared me a thing  
So tell me your idea  
Of what needs to be done  
Tell me when you think the war is won  
A town full of fakes, no one left to believe  
When will I get my relief

You're all the fucking same  
Day to day, holding hope tight  
And still, nothing fucking changes

Nothing ever changes

And still  
This path I keep treading  
With all of these words said  
Moving on is all I have left
