

One Day I Won't Be So Easy To Forget

Capsize

It's far from simple
And as usual
I'm stepping further
Away from comfortable

I'm not done
Till I've told everyone
Goodnight from a thousand places
I'm not done
Till I've seen everything
And you can't even remember our faces

Just face it
There's no changing me

I know you hate me, that's ok
'Cause I promise it's no deeper than my own
I know you hate me, that's ok
'Cause I promise we're both better on our own

Just like the sun on your face
Just like the dirt on your grave
Just like the sun on your face
Just like the dirt on your grave
I am never going away

I just can't take how it feels
And now I'm standing alone
I just can't take how it feels
And now I'm standing alone

There's no hell
More imprisoning
Than the memories
That you left with me
There's no hell
More imprisoning
Than the memories
That you left with me

I know you hate me, that's ok
'Cause I promise it's no deeper than my own
I know you hate me, that's ok
'Cause I promise it's no deeper than my own
I know you hate me, that's ok
'Cause I promise we're both better on our own
