Capsize

I can't escape this feeling  
That no one can see the things I'm seeing

I've been pushed aside  
I've been outcasted  
Please not another day  
In this place I'm in  
I was left to die  
With the left behind  
Do you feel the pain  
Burning in my eyes  
I know it's not bad luck  
Just no one gives a fuck  
and I can't see past this moment  
The lonely feelings overtake me  
As I let the pain just fucking break me  
Let it fucking take me

So now I'm fucking sinking  
Every day  
Lower and lower  
It's the same old feeling  
Another year  
Over and over

Lower and Lower

How much loss does it take for a winner to accept defeat  
How much weight does it take to break the spine of a man on his  
feet
