

Side By Side

Caravan

You could with a smile, make it so that I feel better
Cos you make the clouds that surround me disappear
If I had been somebody else, not seen for myself
Would you have tried to tell me at all
I could never hide the hurt I feel inside
When I saw you there, lost in his arms

In many ways it seems, I've been here
In my dreams before now
And the strength of deceit still
Appals me more than the fear
But we got much more than the rest
A chance to start afresh
Knowing at least well have tried if we fail
Common sense dictates, avoid your past mistakes
And don't look back, you'll fall off the rails

Side by side from now on
Side by side from now on
Takin' the world off your shoulders
Livin' the life in you heart
Ooh don't try to deceive
You'll tear it apart

Heaven knows why time is passin' by slowly
But if you think, hes the best friend that
There could ever be on our side
So its farewell to all the past
Build something to last
So long all your night times of fear the
Worst will never come as long as we are one
And don't invite temptation here

Side by side from now on
Side by side from now on
Takin' the world off your shoulders
Livin' the life in you heart
Ooh don't try to deceive
You'll tear it apart
