

## Vomited Anal Tract

Carcass

Oral eruption  
Rectal extroversion...

Your vagus implodes, as nausea strikes  
Savaging your body in terminal retch  
Violent spasms and decaying enzymes  
Engulf your throat as you belch

Intestinal disturbance, your ileum turns inside-out  
Your duodenum is thrust up towards your mouth  
Your pancreas excretes stale septic pus  
Your whole digestive system is now a sticky mush

Rectal vomit in your thorax  
Retch your anal tract

Liquidized oesophagus mixes with bloodied excretion  
As you pathetically gasp for breath  
The stench of hot faeces scorch your nose  
As you violently vomit to death

Your intestines are rising, up towards your throat  
Stale bile escaping through your bloodied nose  
Your colon digested into acidic slush  
Your tongue gargling on your dislocated anus
