

Restless

Carcosa

One by one, you let the dominoes fall
Single file, bring them in
Sought out to reform them all

"These savages will have to learn this the hard way
Pray to our God or find yourselves in a mass grave

Get in line, get in line, get in line
Meet my radicalized vision of mankind
I am the shepherd who brought the sheep to slaughter
I am a wolf disguised as a martyr

I am the shepherd who brought the sheep to slaughter
I am a wolf disguised as a martyr

Born into pestilence
I see you all as lesser than
Based on your beliefs and pigmentation of your skin

You're all the devil's children
And God will be thy name
I'm here to rid you of your sins
I'll set your world ablaze"

Ashes rain...

Down on their nameless graves
Never to be seen again
Where the fuck are they now?

Tears will fall where cathedrals still remain
We're still finding them
We won't stop finding them

But we remain complacent in these archaic ways
Our vision is clouded, ingrained into our society
Innocent youth, buried six feet deep
We close our blind eyes and slowly fall asleep while

They lay restlessly
