

Nurses Whispering Verses

Cardiacs

All fear and power
All ready for warning me
Askew with red jettied eye
All as a day in sand (and rain)
And when you're near all me now
And then think never before did it seem so far away
All hostile to me
The nerve is bared the sense is real

There's places and houses fired
Inspires all fire in the inside you
Times are fine find all nine
And nurses find me in again

Treating our matey kiteman
Boiling off his belly
Papering his length all off his swing
He mask his hand and he grin to stay here
Or even to play here
Rather than be kept in on his own

We only know what doesn't show
What do don't ask me why
Oh we're in again and we're all the same
Red as egg laid on the page
Don't mind the unbalanced mind
It's fine and mine and yours too
Share with me and me is clean and

Treating our matey kiteman
Boiling off his belly
Papering his length all off his swing
But I don't really think so
Maybe I don't think I care
So no one else can know
Ah well another day
Now now
