

A stitch in time saves nine in time  
To stay alive 'cause we are so divine  
In my mind I can't stop dying  
I wish there was no stopping me now  
In the hope I'm to grow old  
I've been told to keep my head down to the ground  
It's like standing in the playground  
Looking at the ground trying not to notice  
All the kids around

The will to be kind is mine but  
That's the way we all go  
The people subsiding are always advising that  
That's the way we all go

Calling is craving is letting the rain in  
It peers at me and is it understanding?  
Ha!  
Holding me with all its derelict charm  
Rushing round me and slipping but never falling  
Down!  
"Give me something I don't need"  
My friend cried till his face bled really really red  
It stays here all my life, it fears towards me

The will to be kind is mine but  
That's the way we all go  
The higher the chances the higher the climb, but  
That's the way we all go

Is everybody happy?

My hope day is forever coming closer  
My hopes and fears are uncommon and it's he  
Who asks for me now  
So I'll stay here until it's saving my life  
Sing la la la la la la la  
Outside!
