

Do Without You

Caribou

Do without you

I should have known that it would be like this

No matter what we do it always ends like this

I should have known that you would leave me

But every time I tell you, you don't understand

Only if you promise you'll believe me

So why can no one else ever understand?

But every time I tell you you don't understand

You only call me when you need me

But every time I tell you you don't understand

But every time I tell you you don't understand
