

Gravity Lies

Carina Round

It's how you know you're alive
Earth's gravity lies
Up in that head of fire
And some madness
Will it drive you along
Your collision track
'Til the skin pulled across your bone
Comes crawling back

Follow, follow where you're headed
A world with only you in it
Collide, collide bruised and expired
Follow what you've found
All the way down

Until it blows your mind
Thrusts you open wide
One greedy body to body
Won't fasten a heart cold and still
Waiting, held open 'til morning
And it rips through every cell
The burned and the burning

Follow, follow where you're headed
A world with only you in it
Collide, collide bruised and expired
Follow what you've found
All the way down

Earth's gravity lies
