

Fluorescent Lights

Carissa's Wierd

I guess i'll make it clear now
We all hate ourselves
How many more now? drive myself insane before i've
driven everyone away
If i could walk for a moment of this (bar?) til i hit
the floor
If i could walk from one end of this town
To the other
Goes away
The only reason people try to talk to each other
Is cos they gotta say something
That is smarter than the other one said
Everyone's f**king crazy
People never listen to what you have to say
Cos their so damn scared
That you'll be smarter than them some day
Everyone's f**king crazy
But i hate these flourescent lights
If i could walk for a moment every spore and cell
I'd hit the floor
If i could walk from one end of this town
To the other
I wouldn't go anywhere at all
I could talk to you and you could talk to me
I would say anything at all
I could talk to you and you could look at me
I would say anything at all
The only reason people try to talk to each other
Is cos they gotta say something
That is smarter than the other one said
Everyone's f**king crazy
People never listen to what you have to say
Cos their so damn scared
That you'll be smarter than them some day
Everyone's f**king crazy
But i just hate these flourescent lights
