

To Be There Now

Carissa's Wierd

Sometimes you get what you wish
i dont have to remember here
you're really close this time
i think its better to keep in your head
all the things you tried to have
maybe we already had the good times
maybe we left them behind
so forget the way it made you feel
dont forget it made you want to die
and all these scars
just wont ever seem to go away
do you ever think about the way
all these things they used to be
i think i lost it all out there
i think you know exactly what i mean
so i'll never go back
do you wish they remember still
it can happen again
maybe you should save in your head
all the things you tried to hide
did you ever think about her
did she ever make you cry
and all these scars
just wont ever seem to go away
did you ever think about
the way these things they all just used to be
i think you lost it all out there
i think you know exactly what i mean
so just to be there now
one more time with you
i could safely say
its finally the end of all this
so just to be there now
one more time with you
we could safely say
its finally the end of all this
so just to be there now
one more time with you
