

Catch Fire

Carly Pearce

Read my lips, they like to say your name
Watch my hips, they're about to walk your way
I feel your heart race, it's written on your face
I know you like what you see
Read my lips, then come put yours on me

All the curtains are pulled but the door's wide open
Ain't nobody here but us
Yeah, the moon's coming out while the bars are closing
Couldn't make it more obvious
I'm flying that flag, I'm shooting roman candles
I'm screaming through an amplifier
Yeah, the way you're waiting on me to want you
Is like waiting for a flame to catch fire
Waiting for a flame to catch fire

Don't waste your time on sweet formalities
Just show me your originality
'Cause I've got the match if you've got the strike
Then we've got the night to burn
Don't waste my time, just close your eyes and learn

All the curtains are pulled but the door's wide open
Ain't nobody here but us
Yeah, the moon's coming out while the bars are closing
Couldn't make it more obvious
I'm flying that flag, I'm shooting roman candles
I'm screaming through an amplifier
Yeah, the way you're waiting on me to want you
Is like waiting for a flame to catch fire
Waiting for a flame to catch fire

And yeah, the curtains are pulled but the door's wide open
Ain't nobody here but us
And the moon's coming out while the bars are closing
Couldn't make it more obvious
I'm flying that flag, I'm shooting roman candles
I'm screaming through an amplifier
Yeah, the way you're waiting on me to want you
Is like waiting for a flame to catch fire
Waiting for a flame to catch fire

Come on
Light it up

Waiting for a flame to catch fire
