

Target

Carnage

Even when I'm in motion, got a target on my back, 360 no scopin'
And I can't pick up the slack
I'm too in the open
What do I do for it?
Do I ask you for it?
How do we move forward?
Oh
How do you look at yourself in the mirror?
Oh
How do I make the situation any clearer?
Oh oh oh
You can't possibly be that blind, I know you saw it that time

All you do is make up to break up
Baby you need to wake up no

You got that devil on your back
You better be careful dont look back
You better keep telling yourself
You need to wait oh no
You got about one foot in the grave
So how about you come and behave
Cause you just wanna be saved

Oh no

You need to wait oh no? [x4]

You can't get inside my head and make me think I'm wrong

I know i got a target on my back, and you got a lock on

And I'm not sorry and I'm not sad
And I'm not bringing up the past
But I'm the best you ever had
But i came too strong
Cause you knew exactly what it was when you slid through
I remember everything that you did do
You are not an angel
Oh
So when you see me and mine, make sure you and yours make a B-Line
My new chick fine, imma be fine, you know how these things go

How do you look at yourself in the mirror
Oh
How do I make the situation any clearer?
Oh oh oh
You can't possibly be that blind, I know you saw it that time

All you do is make up to break up
Baby you need to wake up, no

You got that devil on your back
You better be careful don't look back
You better keep telling yourself
You need to wait
You got about one foot in the grave

So how about you come and behave

Cause you just want to be saved but you need to break

You need to wake up, no [4x]
