

How The Knife Gets Twisted

Carnifex

This is a war against all
Let the world dissolve away
Rotting flesh aftermath, there is no escape
No matter what you say
What you say
This is our fate
No one can escape
Dead hearts don't fear death
Take all your fears and lay them to rest

This is a war against all
Only the strong survive, we'll watch the weak fall
Where we're going, we're going alone
If I make it back, no one really knows
Look into the still waters of death, it's your face it reflects

This is how the knife gets twisted
Scream into the void, but no one ever listens
This is how the knife gets twisted
Disease of humanity, survival of the hated

Look into my heart
You'd know that I was gone
Make space in hell, 'cause you know I won't be long
Need another body to feed to the machine
Blood and guts, it's all it really needs

This is hell
And it's all in your mind
External man
Born to die

This is a war against all
Only the strong survive, we'll watch the weak fall
Where we're going, we're going alone
If I make it back, no one really knows
Look into the still waters of death, it's your face it reflects

This is how the knife gets twisted
Disease of humanity, survival of the hated

Let the world dissolve away
Rotting flesh aftermath, there is no escape
Let the world dissolve away
Rotting flesh aftermath, there is no escape
