

Pray For Peace

Carnifex

Blackwidows and grave dirt
All the pills in the world
And it's still going to hurt
Bleeding out takes forever up and down makes it quick
This is for the heretics
You will only find hopelessness in my lyrics
An entire generation on the edge of suicide
I can fucking feel it

Blood against velvet our worlds wrapped in sorrow
Dreams in black and white, for us there's no tomorrow
I've sat with death and this is what we said

From the lips of death
Unholy forgotten text
There is no eternal rest

In my heart of hearts
I'm a cold blooded nihilist
I don't believe in god
Or good things
Only death exists
You can pray for peace
You can pray for peace but death is all you get

I've been saved, god's silence was deafening
I've prayed to Satan and it was the same thing
You can pray for peace but death is all you get

When I have this war paint on
I don't even hear the songs
All I feel is the wrath of hell
Self inflicted wounds that never healed
When I'm on this stage I'll look through you and into the void
Kill. Erase. Destroy

All the violent deaths we died
The lives we stole to save another life
All those times we crossed over and left a part on the other side

In my heart of hearts
I'm a cold blooded nihilist
I don't believe in god
Or good things
Only death exists
You can pray for peace
You can pray for peace but death is all you get

I've been saved, god's silence was deafening
I've prayed to Satan, it was the same thing
You can pray for peace but death is all you get

Blood against velvet our worlds wrapped in sorrow
Dreams in black and white, for us there's no tomorrow
From the lips of death
Unholy forgotten text
There is no eternal rest

In my heart of hearts
I'm a cold blooded nihilist
I don't believe in god
Or good things
Only death exists
You can pray for peace
You can pray for peace but death is all you get

I've been saved, god's silence was deafening
I've prayed to Satan, it was the same thing
You can pray for peace
You can pray for peace but death is all you get

Blackwidows and grave dirt all the pills in the world
And it's still going to hurt
Bleeding out takes forever up and down makes it quick
