

No Daylight

Caroline Jones

No no daylight between you and me
Day day one, we been on the same team
We're on the same wavelength
A tribe of two
No no daylight between me and you

Tell me where'd you come from?
Were you whispering irreverences
Holding my heart for ransom
Across the ocean?
Before I met you
Were you running through the sprinklers in the summer with your clothes on?

Did you know you didn't have to die to get to heaven
Know you didn't have to suffer to love?
You never though that everything would be easy
But you knew that we make it too tough
Now you're pulling me in, spinning me 'round
Honey, things are gonna be lighter now
'Cause I'm holding hands with your white knuckles
'Till you have no doubt

No no daylight between you and me
Day day one, we been on the same team
We're on the same wavelength
A tribe of two
No no daylight between me and you
Between me and you

And we're wiser now, 'cause we got better with time
I bless everything that made you mine
'Cause our days just taste like sunlight
Pouring through the rafters
Afternoon, afterglow
Coffee and cream and wooden beams

No no daylight between you and me
Day day one, we been on the same team
We're on the same wavelength
A tribe of two
No no daylight between me and you
Between me and you

I knew I'd fall someday, but not this hard
This one slipped past the goalie's heart
And my days just taste like sunlight
Pouring in the rafters, pouring in the rafters
Happy ever after

No no daylight between you and me
Day day one, we been on the same team
We're on the same wavelength
A tribe of two
No no daylight between me and you
No no daylight between me and you
Between me and you
