

# Mountains & Valleys

Carpark North

Touch me now, I need to feel your hands  
Fill me up, make me understand  
Why your mountains and valleys change all the time  
'Cause I can't seem to find you no matter how high I climb

Touch me now, I need to feel your hands

Touch me now and show me what is real  
Make me trust in how I already feel  
I am born by a wind, it's like a leaf in the sky  
Oh, 'cause your mountains and valleys are all that I need to find

Touch me now, I need to feel your hands  
Touch me now, I need to feel your hands

I feel it burnin' from inside of my chest  
Like we got one life, one time, just one night left  
We're inside of a rocket, just about to eject  
Gotta be done, right one, try, just one stride left  
I feel it burnin' from inside of your chest  
Like we got one life, one time, just one night left  
We're inside of a rocket, just about to eject  
Gotta be done, right one, try, just one stride left

Touch me now, I need to feel your hands  
(Touch me now, I need to feel your hands)  
Touch me now, I need to feel your hands  
(Touch me now, I need to feel your hands)  
Touch me now, I need to feel your hands  
(Touch me now, I need to feel your hands)  
Touch me now, I need to feel your hands
