

Red Lights

Carpark North

Red lights are warning you
But you just close your eyes
Red lights they call on you
But you don't realize

How deep in this mess you are
If you keep it up you're going too far
You don't see what you're doing
You're just turning and burning and turning your back to it
(Red lights)
Yeah
(Red lights)

Red lights keep blowing up
They tell you not to move
But red lights don't make you stop
You don't go by the rules
How on earth did it get this far
How I miss the one you truly are
You don't know what you're doing
Still burning and turning away

But hold on
I can see that you're hurting
From the weight of your burden
Hold on, hold on

I'm right here
Can you see that you're falling
Do you hear that I'm calling out for you
We're so far apart
Red lights

Red lights, they pass you by
Full speed ahead
Running red lights all the time
Try to slow down instead

Fires burn all along the horizon
An inferno of red lights, it's rising
You don't even see them
'Cause your eyes are closed

You really need someone to tell you
Your world is falling down
I wanna be the one that helps you
Out
'Cause I miss you

Hold on
I can see that you're hurting
From the weight of your burden
Hold on, hold on
Right here
But can you see that you're falling
Do you hear that I'm calling out for you
We're so far apart

Red lights will bring you down (Red lights)
Red lights will light up this town (Red lights)
Red lights, shine bright (Red lights)
Red lights until you drown

Red lights will bring you down (Bring you down)
Red lights will light up this town
Red lights, shine bright
Red lights until you drown

Red lights will bring you down
Red lights will light up this town
Red lights, shine bright
Red lights until you drown
