

Blend

Cary Brothers

I just want you to know
Breaks come harder as we go
Won't you show me your escape
If all the sirens howl again

Don't you wish that all
The colors would blend
Don't you wish that all
The colors would blend
And everything will make sense
In the end
Don't you wish that all
The colors would blend

Is this the start of the show
Do you care, do we really want to know
I can't remember my own name
Won't you stay, I need a friend

Don't you wish that all
The colors would blend
Don't you wish that all
The colors would blend
And everything will make sense
In the end
Don't you wish that all
The colors would blend
