

# Under Control

Cary Brothers

Lost a night again  
This path is taking its toll  
All your worry spent  
In broken glass on the floor

Oh, it's just a bottle that holds  
An empty soul

What was the sign?  
When did you know?  
I promise this time  
To keep it under control  
Under control, under control, under control, keep it under control

The room was spinning round  
You shuffled me to the door  
Heard you tell your friends, all of them  
The lies you told them before

Oh, you're not a victim of hope  
I alone brought you this low

What was the sign?  
When did you know?  
Give me the time  
I'll give you control  
Under control, under control, keep it under control

I've nothing to defend  
And you have suffered enough  
Help me make amends  
Under control  
Under control, under control, keep it under control  
Keep it under control, keep it under control  
Keep it under control, keep it under control
