One More Night

You are all I can remember After all that we've been through Forever in my heart Now I'm through And June feels like November Still can't believe it's true Too long we've been apart

One more night I wanna to be with you Where I wanna to hold you tight It feels so right, tonight So leave it up to you And I think the time is right to stop the fight One more night I wanna to be with you Where I wanna to hold you tight It feels so right, tonight So leave it up to you And I think the time is right to stop the fight

Why can't true love be forever? Why did my dream explode? The day you went away Cause I will keep this spell together And wish you well of hope Your girl from yesterday

One more night I wanna be with you Where I wanna hold you tight It feels so right, tonight So leave it up to you And I think the time is right to stop the fight One more night I wanna be with you Where I wanna hold you tight It feels so right, tonight So leave it up to you And I think the time is right to stop the fight
