

Shining a Light

Casey Abrams

It's a warm warm breeze
And it feel so nice
It's a warm warm breeze
And it's burning my eyes
I get that feeling it's so appealing
That you and me we'll be healing

That's life that's life
You know we'll find
Look up in the sky
I'm really high
I'm just shining light (shining light)
I'm just shining light (shining light)
(Shining light) (shining light)
(Shining light)

It's a weird weird smile that I know of too well
Have you been through the nine stages of mother fuking hell
I know it's crazy
And call me spacy
But I know lately I'm going crazy

That's life that's life
You know we'll find
Look up in the sky
I'm really high
I'm just shining light (shining light)
I'm just shining light (shining light)
(Shining light) (shining light)
(Shining light)

I'm just shining light (shining light)
I'm just shining light (shining light)
(Shining light) (shining light)
(Shining light)
