Caspian

Now and then
Track of the days
Get lost in the place where I dragged it all out
What a life
All of the charms lost in the dark
Fool for your beacon eyes
The shakers scream at winning speed
Leaving me Olympic rings
They're behind us now
Now and then
Got a heart full of gold
We'll never get back time we stole and shook off
The shakers scream
A swallowed sea leaving me fever dreams
They're behind us now

Forever our perfect length figure 8's every night
Forever our perfect length figure 8's every night
Forever our perfect length figure 8's every night
The thinnest ice and we fall
In all we're all freezing through and we won't get far
Forever our perfect length figure 8's
Where are we now?
Now and then
Track of the days
Get lost in the place where I let you all down
