

# Northern Train

Cass McCombs

Northern Train  
Northern Train  
Northern Train  
I'm riding on the northern train

I have stood by myself in the dark  
Stolen from my family's arms  
So take me back to home again  
I'm riding on the northern train  
I'm riding on the northern train

Northern train  
Northern train  
Northern train  
Northern train  
Northern train  
Northern train

If the tracks are good I'll ride them home  
Through night and day  
Headlights gonna lead the way  
Passing by the fields of grain  
I'm riding on the Northern Train

Northern train  
Northern train  
Northern train  
I'm riding on the northern train

They blasted through mountainsides with dynamite  
So I could hold my baby tight  
Conductor, save my soul again  
I'm riding the northern train  
I'm riding the northern train

Northern train  
Northern train  
Northern train  
Northern train  
Northern train  
Northern train

Through wind and rain and lightning storms  
Under sun and the stars  
This engine pulls a line of cars  
With the fury of a hurricane  
I'm riding on the northern train  
I'm riding on the northern train  
I'm riding on the northern train  
I'm riding on the northern train
