

# Burn The Light

## Cast

It seems so natural  
That we should only try  
To open up what's closed and not keep it inside  
If you don't burn the light  
It's hard to find

If you can catch the morning as it rise  
You will see the sun that burns the sky

In between the moment, walking in my mind  
Caught between the crossfire standing in the light  
Where was I supposed to be, what am I to do?  
It's only make believe that nothing else is true  
It's only make believe that nothing  
That you do won't last forever

It seems so natural  
That we should only try  
To open up what's closed and not keep it inside  
If you don't burn the light  
It's hard to find

If you can see the darkness in your sight  
It's closing in like blackness fills the night

Burn the light  
Burn the light  
Burn the light
