

I Never Can Say

Cast

How did you get close (everybody)
How did you get close (everybody)

The moment I first set eyes and I opened the door just for you
And there in the distant sky, clouds formed pictures of you
So I sit as the days passed by, I'm caught in the spell cast by you
And I hear that there's no reply to the questions I'm asking of you

I dream about the things, I dream about the things (this means everything to me)
Dream about the things you do
I talk about the need, talk about the need (this means everything to you)
Talk about the need of you

I never can say just what I'm feeling (everybody, everybody)
Ah it's better this way (everybody, everybody)
For I've got no reason to doubt (everybody)
I've got no reason

And if you drift right off course I'll wait on the shore just for you
I've heard it's been said before, I was fooled by the tricks you used

But I dream about the things, I dream about the things (this means everything to me)
Dream about the things you do
I talk about the need, talk about the need (this means everything to you)
Talk about the need of you

Because I never can say just what I'm feeling (everybody, everybody)
Ah it's better this way (everybody, everybody)
For I've got no reasons to doubt (everybody)
I've got no reasons to doubt

How did you get close to me
How did you get close to me

I dream about the things, I dream about the things (this means everything to me)
Dream about the things you do
I talk about the need, talk about the need (this means everything to you)
Talk about the need of you

Because I never can say just what I'm feeling (everybody, everybody)
Ah it's better this way (everybody, everybody)
I've got no reason

I never can say (everybody, everybody)
I never can say (everybody, everybody)
I never can say (everybody, everybody)
I never can say (everybody, everybody)
I never can say (everybody, everybody)
How did you get close (everybody, everybody)
How did you get close (everybody, everybody)
