

# Universal Grinding Wheel

Cast

And with this wheel that life has spun  
It won't end once it's begun  
You must ring the bell that's rung  
Just keep on ringing it

Everybody wants to feel a part  
We've got the same beat, beat of heart  
No need to feel like you're alone  
For you belong

And from this well that life has sprung  
You must sing this song that's sung  
It's a simple melody  
We sing along

And everybody wants to feel a part  
We've got the same beat, beat of heart  
No need to feel like you're alone  
For you belong

As you wake and you rise to each day  
Now you long be seen and to be heard  
So praise life's true tenacity  
To weave such a tapestry  
Like a flower from a seed  
From a seed

Everybody wants to feel a part  
We've got the same beat, beat of heart  
No need to feel like you're alone  
When you belong

Everybody wants to feel the same  
We've got the same love, love and pain  
We got the same things deep at heart  
And we belong  
We belong  
Belong
