

Remember Me

Cat Power

Remember me
don't ever forget me child
we all are only here
just for a little while
you remember that guy
that guy you were dating
he broke your heart
and then just walked away
yes, you did know
you remember when you were sick
you were cripple and you were lame
I stood by your bedside
'til you were on your feet again
yes, I did know you were tired
and you want to be free
I need someone
to stand just right by me
all day and all night
again and again and again
I can't stop now
with you my life
my life has been so wonderful
I need your love
I need you to walk
all day and all night remember me
don't ever forget me child
we are all only here
just for a little while
please, please remember me
