

## You Get

Cat Power

You take-a-take and you a-gave-gave-gave what you get  
And you'll make, make, make and you'll pretend what you forget  
You never take time, no, you'll never take mine

But if you don't, you could be getting, you'll be getting again

If you don't, you will be getting, you'll be getting again  
If you don't, you will be getting, you'll be getting again  
And would you want, you won't be on time

You cross the street, you got the feelin' on me  
You never listened to the reason, you tell to me  
You never listened to time, you never build up the times

You never listen, you will get, you get, you get what you get  
You never listen, you will get, you get, you get what you get  
You never listened beyond the time

And on the street, they're all talkin' 'bout the things you should listen  
And on the news, they're always excusin'  
And when you tell your friends what you think you ever  
And, no, there's nothin' like time, to teach you where you have been  
And there is nothing like time, to give you things you can need

But when you listen to the rhythm of the movements that's right

And you've been tellin' me, always tell me right  
It's not nothin' I know, it's just somethin' outside  
You always listen your way, but you take time to get what you want  
And you tell me it's time I am wrong  
And you will live in this world, and you'll get what you get  
And you get what you get, and you will get what you get

But when you tell me there's another time  
And when you tell me there's another time  
I won't remember what you're tellin' me it's time  
I won't forget, I won't forget, I won't forget that it's time

It's time, you get what you get (time)  
You get what you get, you get, you get, you get what you get (time)  
And you'll know when it's time, you'll get it all on yourself (time)  
You'll get it again, you will be getting again (time)

On time, you'll get what you get (time)

Time, you get what you get (time)

When you take time You get what you get, you get what you get
