

## Dragon Ryder 13

Cathedral

Flames are high - lightning fueling my veins  
Dragon appears, i saddle up again  
Purple rain - anguished odyssey  
Cosmic babylon, destiny - yeah

Hold my fire tonight - it's killing me  
Burn dragonryder high - into the next world  
Thirteen hours with thirteen minds  
Bells toll eternally - in this prison

Spectral sky phantom galaxy  
King of fire - chasing after me  
Liquid planets meet into my eyes  
Vision is gone chaos ignites

Hold my fire tonight - it's killing me  
Burn dragonryder high - into the next world  
Thirteen hours with thirteen minds  
Bells toll eternally - bleeding my vision

Radiation, nuclear heaven  
The sun turns inside out  
Warheads flying from the burning moon  
Invisible in magnitude

Black corona supernova  
Orion dwarfed from sight  
Cosmic halo of the void ignites  
We descent into a realm of ice

See if you can take it higher  
Low as high as low can go

Freeze my fire tonight  
Glass dragonryder die - unveil the next world  
Thirteen planets in thirteen dreams  
Transport by death machine - beast of wisdom

Crystal world in coma fantasy  
Pale horse brings a burning key  
Wings of hell to black rainbows die  
Awake again - only half alive
