Dragon Ryder 13

Cathedral

Flames are high – lightning fueling my veins
Dragon appears, i saddle up again
Purple rain – anguished odyssey
Cosmic babylon, destiny – yeah

Hold my fire tonight – it's killing me
Burn dragonryder high – into the next world
Thirteen hours with thirteen minds
Bells toll eternally – in this prison

Spectral sky phantom galaxy
King of fire – chasing after me
Liquid planets meet into my eyes
Vision is gone chaos ignites

Hold my fire tonight – it's killing me
Burn dragonryder high – into the next world
Thirteen hours with thirteen minds
Bells toll eternally – bleeding my vision

Radiation, nuclear heaven
The sun turns inside out
Warheads flying from the burning moon
Invisible in magnitude

Black corona supernova
Orion dwarfed from sight
Cosmic halo of the void ignites
We descent into a realm of ice

See if you can take it higher
Low as high as low can go

Freeze my fire tonight
Glass dragonryder die – unveil the next world
Thirteen planets in thirteen dreams
Transport by death machine – beast of wisdom

Crystal world in coma fantasy
Pale horse brings a burning key
Wings of hell to black rainbows die
Awake again – only half alive
