

# Sing

Catie Curtis

Heaven knows, heaven knows  
This little girl who once was afraid of spiders  
Off she'll go, off she'll go  
In to the world with the strength inside her

To sing through all the danger  
Through all the thunder and the pouring rain  
We sing to draw a circle around us  
When trouble has found us sing

They ring the bells, they ring the bells to move us along  
But find some soft grass to dream on  
The wishing well, the wishing well will keep your heart strong  
But find some good friends to lean on

And sing through all the danger  
Through all the thunder and the pouring rain  
We sing to draw a circle around us  
When trouble has found us sing

Go bravely oh my dear  
For the night is always near

We're walking down, walking down the path toward home  
Through the thorns and foul weather  
Heaven knows, heaven knows we don't walk alone  
We are on this path together

So sing through all the danger  
Through all the thunder and the pouring rain  
We sing to draw a circle around us  
When trouble has found us sing, sing
