

# A Body Farm

## Cattle Decapitation

For every life I take, an ecosystem I create  
Blood and guts consumes my life  
I am the "brutal gardener"  
I - "quantity controller"  
"no more insane than Jesus Christ."

Forgive my humble abode  
Rotting bodies clogging the commode  
Please pardon the stench and the trunk of a man lying on the workbench

Out by the shed are buzzing hives made of human heads  
The gestation of larvae tells us  
the time of death

Decomposition - An exhibition of life that springs from tragedy

Degeneration - Breakdown and maturation of DNA: The residue of death

The twilight falls on maggots burrowing in flesh  
Dead - the dead now dead as can be

The cadaver now giving life harmoniously  
A God - This makes me a god

This is absurd and quite obscene - the corruption of human beings  
My back yard now a goddamned crime scene

I am the ying, I am the yang  
Good and evil are one in the same  
No more insane than Jesus Christ"

The smell is part of the charm when you live on a "body farm"  
I walk with the stench of decay along corpse littered paths at the break of the day

Ah, the irony in being a killer, yet in the crime-solving community, I am a pillar  
A corpse turns to mulch with a good roto-tiller"

I kill for the good of man

Decomposition "a morbid demonstration  
The cycle of life - in all its majesty

Degeneration - curdling fermentation of heaps and heaps of human meat

The twilight falls on maggots burrowing in flesh  
Dead - the dead now dead as can be

The cadaver now giving life harmoniously  
A God - This makes me a god
