

# Be Still Our Bleeding Hearts

## Cattle Decapitation

Every new life is a tragedy in waiting  
A fresh beginning for hopelessness  
A new chance to infiltrate, build, then destroy

We all lose everything now  
We all have no other way out

Bizarre, this undying love for this species  
Oppressing the elements we're made of

The soil is rotten  
The oceans forgotten  
The glaciers now molten  
In our tracks we are frozen

Be still our bleeding hearts  
Death is part of life  
Embrace time's eraser  
Ditch the ignorant philanthropy  
The scale has tipped and not in our favor

Approaching 8 billion and counting  
Sadly, we require disease, mass murder and blind genocide

Every new death is a step towards preservation  
Eradication in training  
An inch towards progress for the future of life

We all lose everything now  
We all have no other way out

Be still our bleeding hearts  
Death is part of life  
Ditch the ignorant philanthropy  
The scale has tipped and not in our favor

Approaching 8 billion and counting  
Sadly, we require disease, mass fatalities and extinguishing  
This battle already lost to ourselves by the billions

Human life is simply not sustainable
