

## Another Half

Cautious Clay

I need another half, like I need you  
Not too many sober nights, I'm wound up tight  
But you're the answer  
You want a good laugh and a loose screw  
To change your mind  
The bulb is bright  
You're the answer

We revel in the silence  
On our own little islands  
But we can't be alone  
We didn't get here intentionally, yeah

But a change won't fix what our minds don't want  
And the wait won't give, but it's giving me something

I need another half, like I need you  
Not a lot of sober nights  
I'm wound up tight  
But you're the answer

I need a good laugh and a loose screw  
To change my mind  
The bulb is bright  
You're the answer

How many times have we said  
The affection was fleeting  
Just a feeling we chased

We had a similar stories  
With similar endings  
By the time we turned 40  
We'll be stuck in that feeling

'Cause we've always had loose strings  
Might as well tie the two

Just took another half, 'nother half, 'nother half, with you  
I need another half, 'nother half, 'nother half with you  
Just took another half, 'nother half, 'nother half with you  
It's just a feeling we chase
