

Candle

Cavetown

Nothing's happened, you can calm down now
You're not a monster and no one's going to shut you out
Mum and Dad love you, you can come home now
Of course your friends love you, what are you talking about
Have the strength to push away all the pain from yesterday
Cause there's nothing worth crying about
Your heart is a candle and I won't let you blow it out

So what, you messed up, at least it won't happen again
Every time I screw up I feel I've let down all my friends
Stumbling through a thousand stars and neon cars break through
my skull
There's so much life out here in space it's crazy that we're here
at all
