

Straight Through My Head

Cavetown

Parasite
I'm onto you
You termite
I'm stuck in your tooth

But I'm the body
Origami, ooh
Straight through my head, straight through my head, do it
Try to fold me
I'm already up to seven
That's the limit, pin me straight through my head
Straight through my head, do it

You're not real
You're not real
You're not real
You're not real
You're not real
You're not real

Double dare you
Does it scare you? Ooh
Straight through my head, straight through my head, do it
You can't give me a complex
I already have one
No lobotomy, straight through my head
Straight through my head, do it

Straight through my head, straight through my head, do it
I don't wanna deal with this, I'll put you in orbit
Straight through my head, straight through my head, do it
I'm not your psychiatrist, you can't even afford it
Straight through my head, straight through my head, do it
I don't wanna compromise, I don't wanna forfeit
Straight through my head, straight through my head, do it
I'm just trying to occupy the body I was born in

Straight through my head, straight through my head, do it
There's no other option
Straight through my head, straight through my head, do it
It's not even important
Straight through my head, straight through my head, do it
It's not even important
