

# Without You

Cavo

I'll leave a light on in the dark  
So save your breath for the hardest part  
There's a reason you would change  
With no more feelings there's no more pain  
I will find you where you go  
The first in line but the last to know  
You're a needle in a vein  
And you'll never leave me again

Where did I go wrong  
Where did I go wrong

I'm tired of living this lie around you  
I wanna live in my world without you  
I don't want to, need you  
Wanna live in my world without you  
I'm tired of living this lie around you  
I wanna live in my world without you  
I don't want to, need you  
Wanna live in my world without you now

We shared the moment in the pain  
But the head still knows what the heart can't say  
Like a needle in a vein  
And you'll never leave me again

Where did I go wrong  
Where did I go wrong

I'm tired of living this lie around you  
I wanna live in my world without you  
I don't want to, need you  
Wanna live in my world without you  
I'm tired of living this lie around you  
I wanna live in my world without you  
I don't want to, need you  
Wanna live in my world without you now

(Every one you needed let you down  
There's a reason...)

I'm tired of living this lie around you  
I wanna live in my world without you  
I don't want to, need you  
Wanna live in my world without you  
I'm tired of living this lie around you  
I wanna live in my world without you  
I don't want to, need you  
Wanna live in my world without you now...
