

Sick

CeCe Peniston

Ohh whoo...

Oh baby

You broke my heart
The only thing I asked
That you never do
Oh, but you did
And now I can't sleep or breathe
My home is an empty shell
And you could care less
That I'm in hell

Oh, my love has always been stronger
There's no surprise you let go
Talking bout friendship
Left me lonely in love
I guess your love
Was never really unconditional

I'm sick
With third degree burns
On my hands from holding on
For so long
And to you it's just another sad song
You were dead wrong about me
Now you left me here again
Feeling sick and lonely

Almost a month has passed
Still you don't see
The past advice you've taken from you friends
Got you thinking crazy
And another holiday has gone by
Without a sentimental care
A true soulmate could never go
This long without or still have doubt

Oh, my love has always been stronger
There's no surprise you let go
Talking about a friendship
Left me lonely in love
I guess your love
Was never really unconditional

I'm sick
With third degree burns
On my hands from holding on
For so long
And to you it's just another sad song
You were dead wrong about me
Now you left me here again
Feeling sick and lonely

Yet I'm so sick about it, baby
So lonely
(Been holding on for too long)
Feeling so sick and lonely baby

Yes you do lonely

I don't ever really really want to feel this way again no
Tears running down my face
