

Only You

CeeLo Green

I started a war and I landed on my own sword
Wish I could take back those stupid things I said
How could I be so foolish
I called out to God but the devil keeps answering
I'm trying every little remedy I can
But this is all just bullshit

When everybody says, time will clean up this mess
But only you, only you...
Only you can make it better put me back together
Come on baby let's be real
Only you, only you...
Only you could stop the bleeding, give me what I'm needing
Tell me so my heart can heal... only you

I'm dressing my wounds but blood it keeps soaking through
Yeah I cut just a little bit too deep
And I feel so dizzy
I pick up my phone and throw it against the wall
And I cry like a baby in my sleep
Without you, with me

When everybody says, time will clean up this mess
But only you, only you...
Only you can make it better
Put me back together
Come on baby let's be real
Only you, only you...
Only you could stop the bleeding, give me what I'm needing
Tell me so my heart can heal...

Only you can make me smile in the pouring rain
And you can take the hurt right out of my pain
I know I can try to fill the space inside
With somebody else but there's no use

But only you, only you...
Only you can make me better
Put me back together
Come on baby let's be real
Only you, only you...
Only you could stop the bleeding, give me what I'm needing
Tell me so my heart can heal...
Only you
