

People Always Change

Celeste

Different days come in different weather
I know when I'm with you
I don't care now we're not together
Just still some things you can't undo

And you are the one who knew me when
Are the one who knew me when
Are the one who knew me when
Everywhere

People always change
It's just no good for me 'cause I just stay the same
And you know where I'll be, as still as I remain
There's just no one for me 'cause people always change
People always change
It's just no good for me 'cause I just stay the same
And you know where I'll be, as still as I remain
There's just no one for me 'cause people always change

I'm not ready to forget yet
Though I know I must try
People like you, people like me
Everyone getting by

And you are the one who knew me when
Are the one who knew me when
Are the one who knew me when
Everywhere

People always change
It's just no good for me 'cause I just stay the same
And you know where I'll be, as still as I remain
It's just no good for me 'cause people always change

In a world that won't move
I get sick of it sometimes
In a world without you
I get sick and then I try
In a world without you
I get sick and then I find
In a world that can't replace you
I can't see

So if you miss the way
The way it used to be, you could call my name
And I'll be there in a hurry, on the way
I won't be what you knew 'cause people always change

You are the one who knew me when
Are the one who knew me when
Are the one who knew me when

I thought I was nearly there
