

Breakout

Celldweller

It's been seven long years in a slam on Helion
We've been here for so long we can't Remember who we are
And we eye the sky through prison bars,
Hope fading with the light
To hell with this cell, we're breaking out tonight

(We're breaking out)

Been gone seven long years from the place That I call home
My only crime is that I'm made of flesh, Circuit and bone
As we eye the sky we see the light of our Faction's satellite
To hell with this cell, we're breaking out tonight

(We're breaking out)

It's been seven more years that have passed Since we've been gone
New frontier with no fear - we remember who We are
And we eye new skies with distant suns, wait For New Elysium
No more hell in that cell,
No breaking out tonight

To hell with this cell
We're breaking out tonight

To hell with this cell
We're breaking out tonight

We're, we're, we're
Breaking out tonight

To hell with this cell
We're breaking out tonight
