

# Tender Is The Night

Celtic Thunder

Lonely is the night  
When you're dreaming all alone  
Dreaming of the one  
The one that you can call your own

But now, at last, I found  
The love that I've been searching for  
And everything feels right  
When you hold me tight  
Tender is the night

After all this time  
After all the loneliness  
Yearning for your touch  
Yearning for your tenderness

But now, at last, I found  
The magic of your sweet caress  
And everything feels right  
When you hold me tight  
Tender is the night

You have made my spirit whole  
And you have touched my very soul  
Your love just shook me to the core  
Opened every door  
Made me cry for more

I believe in love  
Just as I believe in you  
And in the power above  
To make our every dream come true

And I believe  
That we will love until eternity  
The future seems so bright  
When you hold me tight  
Tender is the night

You have made my spirit whole  
And you have touched my very soul  
Your love just shook me to the core  
Opened every door  
Made me cry for more

I believe in love  
Just as I believe in you  
And in the power above  
To make our every dream come true

And I believe  
That we will love until eternity  
The future seems so bright  
When you hold me tight  
Tender is the night
